☐

This opinion has been established on the basis of a translation from the original language into the following language

_____, which is the language of a translation furnished for the purposes of international search (under Rule 12.3 and 23.1(b)).

2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

☐

a sequence listing

☐

table(s) related to the sequence listing

b. format of material

☐

in computer readable form

c. time of filing/furnishing

☐

contained in the international application as filed.

☐

filed together with the international application in computer readable form.

☐

furnished subsequently to this Authority for the purposes of search.

3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

4. Additional comments:

Box No. II Priority

1. ☒ The following document has not yet been furnished:

☒ copy of the earlier application whose priority has been claimed (Rule 43bis.1 and 66.7(a)).

☐ translation of the earlier application whose priority has been claimed (Rule 43bis.1 and 66.7(b)).

Consequently it has not been possible to consider the validity of the priority claim. This opinion has nevertheless been established on the assumption that the relevant date in the claimed priority date.

2. ☐ This opinion has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rules 43bis.1 and 64.1). Thus for the purposes of this opinion, the international filing date indicated above is considered to be the relevant date.

3. Additional observations, if necessary:

International application No.

PCT/EP2004/010910

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-10.	YES
	Claims	-	NO
Inventive step (IS)	Claims	1-10	YES
	Claims	-	NO
Industrial applicability (IA)	Claims	1-10	YES
	Claims	-	NO

2. Citations and explanations:

Document **D3** is regarded as the closest prior art compared to the subject matter of claim 1. It discloses (see paragraphs 1, 9-11, 15-17, 47, 84-88 and claims 3, 5 and 6) synergistic fungicidal mixtures of triazolopyrimidines with strobilurins, e.g. trifloxystrobin, where the present compound I is not explicitly mentioned in this combination. In the cited examples, it is shown that they are particularly effective against various diseases of cereals.

The subject matter of claim 1 therefore differs from the known fungicidal mixtures of **D3** and is thus novel (PCT Article 33(2)). This naturally also applies for the subject matter of the other independent claims 3, 4, 9 and 10.

The problem addressed by the present invention can therefore be considered that of providing novel synergistic fungicidal mixtures based on a specific triazolopyrimidine and trifloxystrobin, where this combination should be particularly effective against rice-pathogenic harmful fungi.

WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/EP2004/010910

Box No. V

Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

The solution proposed for this problem in claim 1 of the present application involves an inventive step (PCT Article 33(3)) since comparative examples show that the compounds "azolopyrimidine A" and "azolopyrimidine C" from D3, which have a similar structure to the present compound II, are considerably less effective in combination with trifloxystrobin against rice blast than the present combination.

Claims 2 and 5-8 are dependent on claims 1 and 4 and thus likewise meet the PCT requirements for novelty and inventive step.
